CONTENTS

VOLUME 41 (1976)

Symposium on new developments in mutagenicity testing of environmental chemicals

Opening remarks
by A. Hollaender (Tenn., U.S.A.) . . . . . 1—2
Some old problems in mutagenesis and their bearing on mutagen testing
by C. Auerbach (Edinburgh, Scotland) (Rec'd Feb. 5th, 1976) . . . . . 3—6
Metabolic studies and the evaluation of genetic risk from the viewpoint of industrial toxicology
by Z. Bardoděj (Praha, Czechoslovakia) (Rec'd Feb. 18th, 1976) . . . . . 7—14
Practical evaluation of mutagenicity data in mammals for estimating human risk
by J.G. Brewen (Oak Ridge, Tenn., U.S.A.) (Rec'd Feb. 5th, 1976) . . . . . 15—24
Relationship between acute and chronic exposures in mutagenicity studies in mice
by R.J. Šrám (Praha, Czechoslovakia) (Rec'd Feb. 5th, 1976) . . . . . 25—42
Mutagenicity of chemical carcinogens
by F.J. de Serres (Research Triangle Park, N.C., U.S.A.) (Rec'd May 26th, 1976) . . . . . 43—50
The utilization of in vitro mutagenesis techniques to explain strain, age and sex related differences in dimethylnitrosamine tumor susceptibilities in mice
by D. Brusick, D. Jagannath and U. Weekes (Kensington, Maryland and New York, N.Y., U.S.A.) (Rec'd Feb. 5th, 1976) . . . . . 51—60
Mutagenicity and DNA-modifying activity: a comparison of two microbial assays
by H.S. Rosenkranz, B. Gutter and W.T. Speck (New York, N.Y., U.S.A.) (Rec'd Feb. 24th, 1976) . . . . . 61—70
Evaluation of mutagenicity and carcinogenicity using a three-tier system
by B.A. Bridges (Brighton, England) (Rec'd Feb. 2nd, 1976) . . . . . 71—72
A hierarchical approach to mutagenicity testing and regulatory control of environmental chemicals
by K.C. Bora (Ottawa, Canada) (Rec'd Feb. 5th, 1976) . . . . . 73—82
A predictive testing scheme for carcinogenicity and mutagenicity of industrial chemicals
by B.J. Dean (Kent, England) (Rec'd Feb. 5th, 1976) . . . . . 83—88
Safety evaluation based on microbial assay procedures
by J. Schöneich (Gatersleben, D.D.R.) (Rec'd Feb. 17th, 1976) . . . . . 89—94
The capacity of Drosophila for detecting relevant genetic damage
by F.H. Sobels and E. Vogel (Leiden, The Netherlands) (Rec'd Jan. 29th, 1976) . . . . . 95—106
The culture of human lymphocytes as a test subject for evaluation of mutagenic activity of chemicals
by V.S. Zhurkov and K.N. Yakovenko (Moscow, U.S.S.R.) (Rec'd Feb. 5th, 1976) . . . . . 107—112
Mutagenicity testing and risk estimation with mammals
by U.H. Ehling (Neuherberg, Germany) (Rec'd Feb. 17th, 1976) . . . . . 113—122

Cytogenic analysis of human chromosomes and its value for the estimation of genetic risk
by M. Kučerová (Praha, Czechoslovakia) (Rec'd Feb. 2nd, 1976) . . . . . 123—130
Carcinogenic, mutagenic and teratogenic risks associated with vinyl chloride
by P.F. Infante, J.K. Wagoner and R.J. Waxweiler (Cincinnati, Ohio, U.S.A.) (Rec'd May 13th, 1976) . . . . . 131—142
Relationship between experimental results in mammals and man.
II. Cytogenic analysis of bone-marrow cells after treatment of Cytembena and cyclophosphamide—Cytembena combination
by P. Goetz, R.J. Šrám, I. Kodýtková, J. Dohnalová, O. Dostálová and J. Bártová (Praha, Czechoslovakia) (Rec'd Feb. 5th, 1976) . . . . . 143—152
Karyotype analysis by computer and its application to mutagenicity testing of environmental chemicals
by K.R. Castleman, J. Melnyk, H.J. Frieden, G.W. Persinger and R.J. Wall (Durate, Calif., U.S.A.) (Rec'd Feb. 5th, 1976) . . . . . 153—162
Panel discussion on submammalian systems
by F.K. Zimmermann (Darmstadt, B.R.D.) (Rec'd April 23rd, 1976) . . . . . 163—170
Mutagenesis testing—mammalian systems
by H.V. Malling (Research Triangle Park, N.C., U.S.A.) (Rec'd Feb. 5th, 1976) 171—172
Panel discussion on estimation of risk
by P. Oftedal (Oslo, Norway) (Rec'd Feb. 5th, 1976) . . . . . 173—174
Mutagenicity testing 1975: some personal viewpoints
by H. Böhme (Gatersleben, D.D.R.) (Rec'd Feb. 19th, 1976) . . . . . 175—178
Closing remarks
by F.H. Sobels (Leiden, The Netherlands) . . . . . 179—184
Misrepair of overlapping daughter strand gaps as a possible mechanism for UV induced mutagenesis in *UVR* strains of *Escherichia coli*: a general model for induced mutagensis by misrepair (SOS repair) of closely spaced DNA lesions
by S.G. Sedgwick (Upton, N.Y., U.S.A.) (Rec'd July 12th, 1976) . . . . . 185—200
Ultraviolet mutagensis in *Streptomyces coelicolor*: induction of reversions in a polyauxotrophic strain
by C.H. Clarke and D.A. Hopwood (Norwich, England) (Rec'd May 4th, 1976) 201—208
Association of Salmonella mutants with germ-free rats: characterization of the reverse mutational response to 2-nitrofluorene
by J.H. Carter, L.A. Wheeler, J.A. Ingelfinger, F.B. Soderberg and P. Goldman (Boston, Mass., U.S.A.) (Rec'd April 23rd, 1976) . . . . . 209—216
The mutagenic activity of hydroxyurea in *Chlamydomonas reinhardi*
by M. Adams and J.R. Warr (Heslington, England) (Rec'd Feb. 17th, 1976) . 217—224
UV and γ-ray sensitivity of meiosis-deficient mutants in *Podospora anserina*
by J.M. Simonet (Orsay, France) (Rec'd May 25th, 1976) . . . . . 225—232
Effect of excision repair on azide-induced mutagensis
by A. Kleinhofs and J.A. Smith (Pullman, Wash., U.S.A.) (Rec'd May 4th, 1976) . . . . . 233—240
The relation between repair of DNA and radiation and chemical mutagensis in *Saccharomyces cerevisiae*
by L. Prakash (Rochester, N.Y., U.S.A.) (Rec'd March 3rd, 1976) . . . . . 241—248
Effects of formamide on the induction of chromosome structural changes by ethyleneimine in *Vicia faba*
by H. Nicoloff (Sofia, Bulgaria) (Rec'd Feb. 18th, 1976) . . . . . 249—254
The timing of the restitution of chromosome breaks induced by X-rays in the mature sperm of *Drosophila melanogaster*
by R.H. Maddern and B. Leigh (Leiden, The Netherlands) (Rec'd April 14th, 1976) . . . . . 255—268
The improved "bithorax method" for the detection of rearrangments in *Drosophila melanogaster*
by D. Mendelson (Leiden, The Netherlands) (Rec'd March 8th, 1976) . . . . . 209—276
The distribution of fetal death in control mice and its implications on statistical tests for dominant lethal effects

by J.K. Haseman and E.R. Soares (Research Triangle Park, N.C., U.S.A.) (Rec'd April 26th, 1976) . . . . . 277—288
Detection of X-ray induced dominant lethal mutations in mice: and in vitro approach
by L.S. Goldstein and A.I. Spindle (San Francisco, Calif., U.S.A.) (Rec'd Jan. 30th, 1976) . . . . . 289—296
Cytogenetic effects of protracted exposures to alpha-particles from plutonium-239 and to gamma-rays from cobalt-60 compared in male mice
by A.G. Searle, C.V. Beechey. D. Green and E.R. Humphreys (Harwell, England) (Rec'd May 7th, 1976) . . . . . 297—310
Dose response at low doses of X-irradiation and MMS on the induction of micronuclei in mouse erythroblasts
by D. Jenssen and C. Ramel (Stockholm, Sweden) (Rec'd March 2nd, 1976) . 311—320
The production of micronuclei from chromosome aberrations in irradiated cultures of human lymphocytes
by P.I. Countryman and J.A. Heddle (Downsview, Canada) (Rec'd Jan. 5th, 1976) . . . . . 321—332
Sister chromatid exchange as an assay for genetic damage induced by mutagen-carcinogens. I. In vivo test for compounds requiring metabolic activation
by D.G. Stetka and S. Wolff (San Francisco, Calif., U.S.A.) (Rec'd May 26th, 1976) . . . . . 333—342
Sister chromatid exchange as an assay for genetic damage induced by mutagen-carcinogens. II. In vitro test for compounds requiring metabolic activation
by D.G. Stetka and S. Wolff (San Francisco, Calif., U.S.A.) (Rec'd May 26th, 1976) . . . . . 343—350
Mutagenic effects of AF-2, a food additive, on embryonic cells of the Syrian golden hamster on transplacental application
by N. Inui, M. Kaketomi and Y. Nishi (Tokyo and Kanagawa, Japan) (Rec'd March 8th, 1976) . . . . . 351—360
An investigation into the potential of a mammalian temperature sensitive leucyl-tRNA synthetase mutant for mutagensis studies
by S.J. Molnar and A.M. Rauth (Toronto, Canada) (Rec'd March 22nd, 1976) 361—376
The fluctuation test as a more sensitive system for determining induced mutation in L5178Y mouse lymphoma cells
by J. Cole, C.F. Arlett and M.H.L. Green (Falmer, Great Britain) (Rec'd Jan. 30th, 1976) . . . . . 377—386

Short communications
Mutation frequency decline and the Clarke-Hill effect for UV-induced streptomycin-resistant mutations in an incision-defective *E. coli* strain
by C.H. Clarke and R.F. Hill (Downsview, Canada) (Rec'd Aug. 8th, 1976) . . 387—390
Mutants of *Pseudomonas aeruginosa* deficient in DNA polymerase I
by P.R. Lehrbach, A.H.C. Kung and B.T.O. Lee (Parkville, Australia) (Rec'd Feb. 2nd, 1976) . . . . . 391—394

Report of the conference on in vitro mutagenicity and carcinogenicity tests, Seattle, Wash., U.S.A., July 22—24, 1975 . . . . . 395—400

Announcements . . . . . 401—408
